

## Overview

On December 8th, the Bureau of Labor Statistics (BLS) reported that *employment increased by 199,000 in November, and the unemployment rate edged down to 3.7 percent. Job gains occurred in health care and government. Employment also increased in manufacturing, reflecting the return of workers from a strike. Employment in retail trade declined.*<sup>1</sup> For veterans, unemployment slightly increased from 2.7 percent in October to 2.8 percent in November. Post-9/11 veteran unemployment decreased, going from 4.0 percent to 3.1 percent in November. The overall unemployment trend varies by different veteran demographic factors, with some being more affected than others.

Regarding age, the unemployment rate for veterans aged 18-24 decreased in November, dropping from 9.7 percent to 4.3 percent. The unemployment rate for veterans aged 25-34 decreased from 5.1 percent to 3.4 percent. During this period, veterans aged 18-24 were unemployed at a lower rate than their nonveteran peers of the same age group (7.0 percent), veterans aged 25-34 were also unemployed at a lower rate compared to their nonveteran peers of the same age group (3.6 percent). The unemployment rate for veterans aged 65 and older increased in November,

going from 1.3 percent to 4.0 percent. Veterans aged 65 and older were unemployed at a higher rate than their nonveteran peers of the same age group in November (2.9 percent).

The unemployment rate for female veterans increased in November, rising from 2.4 percent to 3.5 percent. In comparison, female nonveterans had an unemployment rate of 3.1 percent. The unemployment rate for male veterans remained the same in November, at 2.7 percent. By comparison, male nonveterans had an unemployment rate of 3.7 percent.

The unemployment rate for Black or African American veterans decreased from 4.5 percent to 2.4 percent in November. This rate was lower than the unemployment rate for their nonveteran counterparts (5.7 percent). The unemployment rate for Hispanic, Latino/a, or Spanish Origin veterans increased from 1.0 percent to 2.0 percent in November, which was lower than the unemployment rate of their nonveteran counterparts (4.2 percent). However, readers should be cautioned that data on specific veteran subgroups can vary widely from month to month.

Hispanic, Latino/a, or Spanish Origin	1.6	3.1	+1.5	4.1
Asian or Asian American	-	0.9	-	4.1

### UNEMPLOYMENT RATES FOR NONVETERANS

UNEMPLOYMENT RATES FOR:	October 2023	November 2023	Change (+/-)	Annual Averages 2022
18-24	7.9	7.0	-0.9	7.8
25-34	4.0	3.6	-0.4	3.9
35-44	2.7	2.7	0.0	3.0
45-54	2.2	2.4	+0.2	2.4
55-64	2.6	2.8	+0.2	2.6
65 and older	2.7	2.9	+0.2	2.9
Male	3.7	3.7	0.0	3.7
Female	3.4	3.1	-0.3	3.5
White, Anglo, Caucasian	3.1	2.9	-0.2	3.2
Black or African American	5.7	5.7	0.0	6.1
Hispanic, Latino/a, or Spanish Origin	4.2	4.2	0.0	4.1
Asian or Asian American	3.1	3.5	+0.4	2.8

**NOTE:** Although the BLS reports the national average for those 16 and over, the tables above include only those that are 18 and over to make a more accurate comparison to the veteran population. Post-9/11 are of the Gulf War Era II (September 2001-present). Other periods of service include Gulf War Era I (August 1990-August 2001), Vietnam Era (August 1964-April 1975), Korean War (July 1950-January 1955), World War II (December 1941-December 1946). Veterans who served in more than one wartime period are classified only in the most recent one. Veterans who served during one of the selected wartime periods and another peacetime period are classified only in the wartime period. The minority-by-gender unemployment rates are not displayed due to small sample size and are more appropriately displayed as annual.
